## FREEBAIRN CENTRE NOTES

There has been a steady number of events and activities down at the FRC throughout the months of February and March after the traditional lull in January.

We farewelled our Dutch backpackers, Tessa and Nannie in the first week of March after their three months here. We all wish them well in their travels and very much appreciated their diligence and enthusiasm whilst they were here. We welcome Maddie Earle-Sadler to the Rec Centre as Assistant Bar Manager. You will see a lot of Maddie both behind the bar and she will also take responsibility for a lot of the cleaning tasks here at the Centre – not a small job but one Maddie has the enthusiasm to complete well!

On the 16th of March we saw the Kulin Triathlon take place in town. It was great to see so many out and about on the morning with about 60 participants. A fabulous number of children were competing which is great to see and we are already looking forward to the 2020 event and hope to see a few more of our Winter sports teams get on board and put a few entries in.

A big shout out to the volunteers who were there to assist on the day of the event. It goes without saying that without these people the event would not run and I am very grateful to every one for giving up their Saturday morning to help out.

Membership renewals have been posted. Please try to get payment in ASAP so that membership lists can be finalised and displayed in readiness for the Winter Sports Season. If you have not received your renewal notice please contact me at the Centre.

I have included a blank form in the Update for anyone who may not have received their renewal notice or indeed for anyone who wishes to join in 2019.

Until next time....

We welcomed entries in the 4 race categories as listed below:

Long Course – 500m swim, 20km bike, 5km run  
Short Course – 250m swim, 10km bike, 2.5km run  
Juniors 12-16yo – 200m swim, 5km bike, 2km run  
Under 12s – 100m swim, 2.5km bike, 1km run

There were both team and solo entrants in each race.  
Winners and Runners Up for each category were:

## Long Course Solo –

Winner: Jarrad Hubbard 1.00.40

Runner-up: Russell Arnold 1.12.05

## Long Course Team-

Winner: Maria Board & Ruth Tyson 1.14.56

What is WIFE?

The roles of women on farms are significant and varied. Professional support and training to fulfill all of these roles is often unavailable, because courses, can't usually offer what is required, or it is unattainable due to the distance and time needed to attend. This is where WIFE steps up.

WIFE's essence is to tap into the wealth of knowledge that is your neighbor, your friend, your friends friend, the lady up the road, the new girl in town or the wing attack on your local netball team and if the expert required isn't available locally they simply truck them in!

There is great benefit in discussing issues between local ladies, to help each other improve and excel in the many tasks we all take on within our farming enterprises. Meetings would often be in the form of organised discussions between local members. There would also be chances to run workshops and events with guest speakers or experts, if topics of interest are identified by the group.

Any queries or if you are interested but can't attend, call Janelle South 0410 233 903

## The Benefits of play dough

I know play-dough drives some parents crazy –but I feel the benefits far outweigh the mess. When given play dough, children are instinctively motivated to explore its soft and responsive sensory qualities. They squeeze it, poke it, squash it, pick it up and pat it down. but can be another useful way to help your children to release stress.

Simply:

- \* It's fun!
- \* It helps to strengthen small fingers, hands and wrists. Children gain control over their hand and arm movements which improves coordination.
- \* It helps to build your child's imagination.
- \* It helps children develop self esteem -there is no right or wrong way to use play dough
- \* Play dough fosters cooperative play. Playing with dough with others helps children understand the importance of sharing.
- \* Discussing what has been made helps build communication skills and develops imagination.
- \* Dividing it up can be used to help children learn about numbers and counting.
- \* Play dough is a lovely open ended toy – it can be anything – food, animals, faces, shapes etc.

## Our No Cook No Fail Playdough Recipe

2 C P Flour,  
4 tbs Cream of Tartar  
2 tbs cooking oil  
1 C salt  
2 C boiling water  
Food Colouring of choice

Mix all dry ingredients together & combine well. Mix all liquids together & stir. Make a well in dry ingredients & add the hot liquid & stir slowly until it forms together into thick dough. Use of extra flour if too sticky. Also can add, essential oils, flower petals, plastic toys, lavender, rice etc

## **Kulin Child Care Centre has a number of cases of children with hand, foot and mouth disease. Please read the following information regarding symptoms and treatment.**

### **What is hand, foot and mouth disease?**

Hand, foot and mouth disease (HFMD) is a mild viral infection caused by different human viruses, for example, Coxsackie A, enterovirus and echovirus. HFMD is not the same as the foot and mouth disease of cattle.

### **How do you get hand, foot and mouth disease?**

HFMD is spread when a person touches the mucous or saliva, or the faeces (poo) of an infected person. Everyone is susceptible to infection, but many adults will have developed immunity to this infection as a child.

### **Signs and symptoms**

The incubation period is usually around 3 to 5 days. The infectious period remains while there is fluid in the blisters. Faeces also remain infectious for several weeks after the onset of illness.

HFMD usually begins with a mild fever and a runny nose.

This is followed by a sore throat and the appearance of a blister-like rash in the mouth and on the hands and feet, which gradually become ulcerated. Ulcers sometimes appear around the nappy area in babies, but this is less common.

### **How do I know I have hand, foot and mouth disease?**

See your doctor if you think you have hand, food and mouth disease.

### **Treatment of hand, foot and mouth disease**

No specific treatment is required for this infection. However, treatment may be necessary to relieve symptoms such as blisters in the mouth.

### **Complications**

Complications are rare, but this infection can sometimes cause viral meningitis. This condition can cause fever, headache, stiff neck or back pain and those affected may need hospitalisation.

While you have the infection

Children should be excluded from child care, schools or other group settings until the blisters have dried.

### **How can hand, foot and mouth be prevented?**

There is currently no vaccine available for this infection.

You can reduce the risk of getting HFMD by following this advice:

- Wash your hands with soap and water before preparing food, after changing nappies and after using the toilet.
- After changing nappies, clean the surface areas of changing mats, and wipe dry. Wipe over the general changing area with a bleach-based household cleaner, as per manufacturer's instructions.

### **Where to get help**

- See your doctor.
- Ring healthdirect Australia on 1800 022 222.

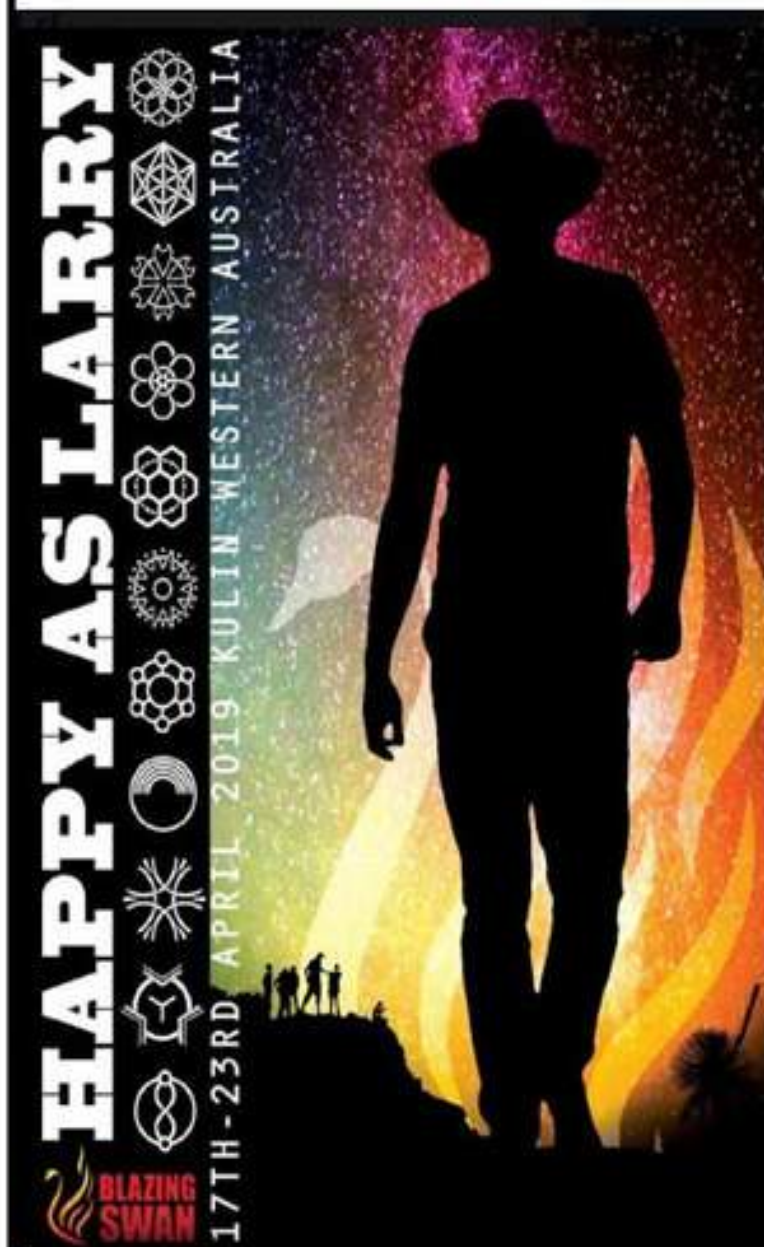

### **Remember**

- HFMD is spread by contact with the mucous or saliva of an infected person.
- Complications are rare, but this infection may cause viral meningitis.
- HFMD can be prevented by good hand hygiene.

## PET OWNERS BEWARE

### Western Shield wildlife recovery program

- The *Western Shield* program is working to reduce fox and feral cat numbers in conservation areas of Western Australia in order to protect our unique native wildlife. The primary way of achieving this is through the laying of dried meat sausage baits containing the poison 1080.
- These baits are poisonous to humans and will kill domestic cats and dogs. Do not take your pets into areas baited with 1080.
- Baiting occurs on a regular and ongoing basis and baited areas must be considered dangerous for pet cats and dogs at all times.
- The baits are extremely attractive to dogs. Adjacent landowners should be vigilant in keeping their dogs from roaming into neighbouring baited areas.
- All baited areas are signposted with 1080 POISON RISK signage.

1080 meat baits used for introduced predator control.

### Baiting locations

- Poison baiting operations extend from Karratha in the north, through forests of the south-west to areas east of Esperance.
- Baited areas include State forest, national parks, nature reserves and conservation areas. Please be aware that it is legal for the Parks and Wildlife Service at the Department of Biodiversity, Conservation and Attractions (DBCA) and other approved neighbours to bait as close as **5 metres** from your boundary and as close as **150 metres** from a known dwelling.
- Maps of areas baited as part of the *Western Shield* program can be viewed on [dbca.wa.gov.au/westernshield](http://dbca.wa.gov.au/westernshield).
- For more information about 1080 poison risk areas please contact your local Parks and Wildlife Service office.

### Native species protection and recovery

- Foxes and feral cats have been identified as a key cause of the extinction and decline of dozens of native animal species across Australia.
- As a result of fox and feral cat baiting, populations of more than 30 threatened native fauna species continue to persist in the wild or have increased in size in WA. Species being protected include some of the rarest animals in the world, including Gilbert's potoroo, western ground parrot and western swamp tortoise.
- *Western Shield* has also facilitated the reintroduction of native animals such as the chuditch, black-flanked rock-wallaby and numbat back into areas where they previously occurred.
- The poison used in baits is based on a naturally occurring toxin in *Gastrolobium* plants, to which native animals have developed a tolerance. However, it is lethal to introduced animals such as foxes and feral cats, as well as domestic cats and dogs.
