# THANK YOU KULIN BUSH RACES

## KULIN AQUATIC CENTRE NEW SHADES

We are sure the community and our visitors are very appreciative of the Kulin Bush Races grant that was received by the Shire of Kulin to install the new shades sails at the Aquatic Centre.

They look amazing and it is fantastic that as a community we can work together and have projects like this one come to fruition which has such a positive impact for all pool users.

The timing has been impeccable with the very hot weather lately. Huge numbers of locals and visitors have cooled off and enjoyed the fantastic facilities we have.

Thanks again to the Kulin Bush Races and all those who volunteer to make our community such a great place to live and a wonderful place to visit.

## Kulin Childcare Centre

Everyone was very excited to start the year back at Kulin Childcare Centre in January. The beautiful new floors have been finished and are providing a very neat clean space.

We started the year with the theme of 'All about me', setting our room corner to include a kitchen, fridge, stove, and ingredients including fruit and veg. The Children really loved getting in and making meals for their friends and the staff.

Outside there has been plenty of action. Practising coordination

using a hammer and nail, the children really enjoy working with real tools and wood. Water play as the weather warmed up, providing a great opportunity for the Children to practise communication, motor skills, and also enjoy the

emotional therapeutic benefits of water. Obstacle courses to provide opportunity for big body movements, building on balance and strength as well as Children learning directional language, and practising taking turns.

We have now changed our home corner to a First Aid station and Dr corner. We are very excited about our up coming visit from Medical Students on Thursday the 14<sup>th</sup> of March. The students Teddy Bear Hospital program will help develop positive health care experiences and expectations, the Children will also learn about different aspects of health and wellbeing through prepared learning stations.

Thank you from the KCCC Team for all the support we receive from the Community with the can donations as well as the children and parents using the centre.

## intention to borrow

Notice is hereby given in accordance with Section 6.20 (2) of the Local Government Act 1995 of the Shire of Kulin's intention to exercise the power to borrow money.

This short-term borrowing facility will be closed when the milestone payments for these projects are received.

For further information please send your enquiries to [ceo@kulin.wa.gov.au](mailto:ceo@kulin.wa.gov.au) or phone (08) 9880 1204 (Monday to Friday between 8.30am - 4:30pm).

# DISTRACTIONS

FACTS AT A GLANCE

rsc.wa.gov.au

**29** people

In 2018 lost their lives in crashes where the WA Police Force believed inattention was a factor. This was a 70% increase compared to the preceding five-year average

\*Primary risk taking behaviour includes speeding, drink driving, non-wearing of seatbelts or helmets.

### Manual distraction

tasks that require the driver to take a hand (or both hands) off the steering wheel and manipulate a device

### Visual distraction

tasks that require the driver to look away from the roadway to visually obtain information

### Cognitive distraction

tasks that are defined as the mental workload associated with a task that involves thinking about something other than driving

### Auditory distraction

occurs when the driver focuses their attention on auditory signals rather than on the road environment

If you take your eyes off the road – to read a text message for example – while driving at 60 km/h for just two seconds, you're travelling 33 metres blind.

Travel speed	Metres travelled in 2 seconds
40km/h	22m
50km/h	27m
60km/h	33m
70km/h	40m
80km/h	44m
100km/h	55m
110km/h	61m

## TIPS ON STAYING FOCUSED

Turn off your mobile phone

Check a map before the journey to know what lies ahead

Don't eat or drink in the car. Take a break instead

Make adjustments before departing, including mirrors, radio and GPS

Ask passengers to be quiet if you can't concentrate

Ensure pets are properly restrained in the vehicle

# SPEED

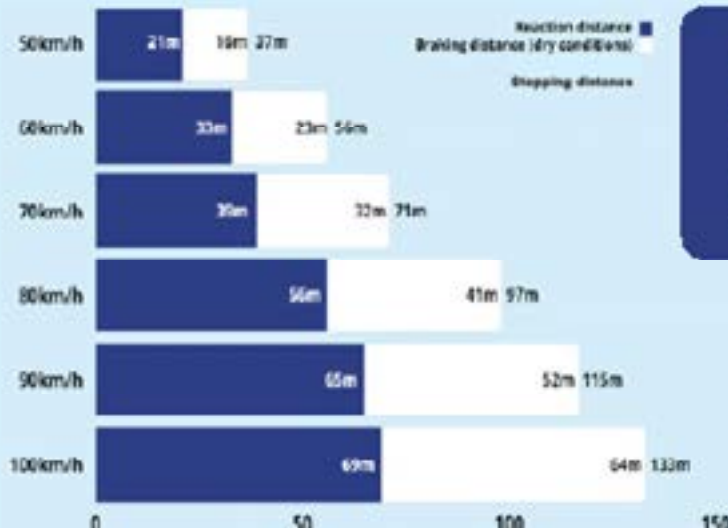

## and how it influences road safety

### Why is speed important?

- A vehicle's speed has a major influence on the risk and severity of road crashes and crash-related injuries.<sup>1,2,3,4</sup>
- As well as following the speed limit when we drive, we should adjust our speed to different road conditions to minimise these risks.<sup>2,5</sup>
- Road conditions when you should consider reducing your speed include:<sup>3,6,7</sup>
  - Weather. If the roads are wet or there is decreased visibility (e.g. fog).
  - Pedestrians and cyclists. In areas of high pedestrian and cyclist traffic, to safeguard these vulnerable road users.
  - Location considerations. In residential areas or areas with high levels of traffic.
  - Type of road. On unsealed or highly congested roads.
  - Wherever else it's necessary to reduce risk to ourselves and others.
- Adjusting your speed in these conditions can create more liveable and safer road environments for communities.<sup>8</sup>

### The faster you drive, the longer it takes to stop

- Your driving speed influences the risk of injury to you, your passengers, and other road users.<sup>2,3,4</sup>
- Increasing your speed also increases your stopping distance (your reaction distance plus braking distance), meaning your risk of crashing is higher.<sup>2,7,8</sup>

Stopping distance influences whether your vehicle will hit an object when coming to a complete stop. If a collision occurs, the stopping distance will influence the severity of the crash.<sup>2,3</sup>

Stopping distances increase on wet roads. Driving at higher speeds extends stopping distances further.<sup>9</sup>

You should adapt your speed to different road conditions to control your stopping distance. This can significantly reduce the risk of a crash and crash-related injury.

That's What ALOSCA Technologies Offers  
**Order Now to Guarantee Supply**

ALOSCA granules provide flexibility like no other inoculant.

Unlike traditional inoculants which are limited in when they can be applied due to the mortality of the rhizobia, ALOSCA Granules can be sown into dry, unfavourable conditions and remain viable in the soil for months until being activated by the same seasonal rainfall that germinates the seed.

**ALOSCA Granules at a glance:**

- Can be dry sown
- Can be used with seed dressings that are typically harmful to other inoculants
- Simple to apply and can be blended with fertiliser, seed or applied by a third box
- Can be stored for extended periods
- No need for lime consuming inoculant slurries to be applied during seeding
- May be applied in the season prior to growing legumes
- Australian owned and manufactured
